1. Summary

Reporting Period	October 2012 – December 2012 + January 2013 – December 2013 <i>Note: This report covers an extended period owing to a change requested to reporting period to coincide with project's financial year-end.</i>		
Technical Specifications in use	System Name & Description		tCO₂-e per ha
	Boundary Planting <i>Planting a border of trees around the field or machamba, or indigenous tree species to reforest an area</i>		118.4 <i>per linear km</i>
	Dispersed Interplanting: Faidherbia <i>Planting nitrogen fixing trees with reverse phenology in the machamba to improve yields and sustainability</i>		116.8
	Dispersed Interplanting: Glyricidia <i>Planting nitrogen fixing trees in the machamba to improve yields and sustainability.</i>		36.66
	Fruit Trees: Cashew <i>Planting a cashew orchard</i>		136.9
	Fruit Trees: Mango <i>Planting a mango orchard</i>		114.4
	Homestead Planting <i>Planting fruit and shade trees around the homestead</i>		154.18
	No Burning of Agri Residues <i>Payments to farmers to incorporate and mulch agri-residues and to not burn them annually which is the baseline scenario [Currently suspended and under review]</i>		26.0
	Woodlot <i>Planting a woodlot of indigenous tree species to provide future firewood</i>		183.3
	REDD+ <i>A conservation programme which rewards communities and individuals for protecting a block of standing forest against deforestation and degradation [Under review]</i>		39 – 158 <i>Dependent upon stratification</i>
Area under management (ha) <i>Implemented Plan Vivos</i>	12 000 ha * ¹	Areas put under management since last report (ha)	0 ha * ²
Smallholders with plan vivos and PES agreements <i>Total for project to date</i>	2799	New smallholders with PES agreements since last report	0
Community groups with plan vivos and PES agreements <i>Total for project to date</i>	28	New groups with PES agreements since last report	0
PES made to communities to date	\$ 2 136 744		
Plan Vivo Certificates issued [to Sept 2012]	346 584		
Plan Vivo Certificates Dec 2013 Requested <i>Agroforestry systems</i>	73 602		
Plan Vivo Certificates Dec 2013 Requested <i>REDD+ system – Request subject to revised Tech Spec</i>	10 877		
Total Certificates to end Dec 2013	431 063 [Once REDD+ Tech Spec review complete]		

Notes:

1. 12 000 ha includes the REDD+ areas and is an approximation as many technical specification systems overlap on the same piece of land for individual smallholders.
2. The project remains in a consolidation and monitoring phase and is not currently opening new plan vivos.

2. Key Events, Developments & Challenges

Transfer of Ownership

In a major change to operating structure, Envirotrade Carbon Limited (Mauritius) (ECL) transferred ownership of 100% of Envirotrade Sofala Lda (ESL) to Associação Envirotrade Carbon Livelihoods (AECL) effective 1st February 2013. ECL at the same time wrote off all intercompany loans, leaving the local entity debt-free.

AECL is a non-profit community association established in 2009 to bring community oversight and ownership into the operations of the project. In terms of the project's PDD (page 64), it was envisaged that during the course of 2013, the project would be handed over to the community to continue operating.

ESL takes over the role as project operator and will take over the management of the Envirotrade Markit registry account. A Mauritius domiciled non-profit Trust [African Carbon Livelihoods Trust (ACLT)] has signed an exclusive carbon sales & marketing agreement with ESL whereby ACLT will handle the international marketing of the project's offsets, and will return sales revenue to the Mozambique company. ACLT will also continue to raise further grant and donor funds.

The management team for the Sofala Project is as follows:

- Mark Heaton [Director of ACLT and ESL] – CEO: Envirotrade
- Antonio Serra [Director of ESL and Member of AECL] – Country Manager: Envirotrade
- Alastair MacCrimmon [Director of ESL and Member of AECL] – Project Manager: Sofala
 - o Resigned effective 1 November 2013
- Aristides Muhate – Carbon Technical Officer, Sofala
 - o Resigned effective 31 December 2013
- Lee Mangochi – Financial Manager: Sofala Community Carbon Project
 - o Resigned effective July 2013

As part of a cost cutting exercise, it was decided not to replace the resignations with permanent new staff members. The Carbon Technical role has been taken up from within by an internal promotion. The accounting role has been transferred to Mark Heaton in South Africa, and Antonio Serra is doubling up as Project Manager, a position that he used to hold before becoming Country Manager.

Change of Reporting Period

As a consequence of the change of project operator, Envirotrade felt it was prudent to align its December financial year-end with its Plan Vivo reporting period. It therefore applied to Plan Vivo to do this, and hence this report covers a 15 month period, ending at December 2013.

Negative Publicity

In late 2012, a Swedish Radio programme, *Kaliber*, ran a particularly negative show about the project in order to discredit the project, and also the carbon offsetting programme of Arla Foods, the major purchaser of offsets from the Sofala Project.

At the start of May 2013, FERN produced a report about the Sofala project where they highlighted many of the issues that the Swedish Radio programme had examined in 2012. In fact there appears to have been considerable collaboration between the two. (See www.fern.org/nhambita)

FERN was considerate in giving Envirotrade access to the draft report and an ability to comment and correct inaccuracies – of which there were many. While they did agree to change some aspects, many of the very subjective opinions and ideological opposition to carbon trading was not changed. Some aspects of the criticism – for example, the claim that farmers are obligated to maintain trees for 100 years in terms of their contracts, are simply factually incorrect.

A decision was taken to assess the impact of the publication of this report before trying to press for corrections to the inaccuracies. As it turned out, the project hardly received any negative feedback from this report, and therefore chose to let it go rather than to raise its profile through increased media publicity.

Many of the points raised by the *Kaliber* programme we believe were incorrect, but there were valid criticisms. Some of the criticisms were levelled at the ex-ante crediting system and are nothing that we haven't heard before, and have addressed many times. In both cases, Envirotrade executives responded in detail to the criticisms. Fundamentally there are people diametrically opposed to forest carbon offsetting, or carbon offsetting in general, and no matter what response one gives, there is no possibility of changing the antagonist's opinion.

What transpired as a consequence of the *Kaliber* story was:

1. Visitors to the Project

At the end of February 2013, Mark Heaton accompanied Peter Wrenfeld from U&We for a 3-day site visit. Envirotrade has always enjoyed hosting existing and potential customers at the site for a number of reasons: (1) It creates an affinity between the people who do the work on the ground, and the ultimate customers for the service – this is good for employee and participating producer morale; (2) It allows customers to witness for themselves the impact the project is having on the lives of the participating communities; (3) It allows for the informal "verification" by the customers that the funding is for genuine activities; and (4) It creates an affinity towards the project and its communities by the customer. This last point has been very beneficial in ensuring repeat and loyal purchases by a number of customers over an extended period.

Peter's visit was used particularly for him to gain a first-hand insight into some of the issues raised by the Swedish Radio report about the project. He met with producers who have been very successful with their contracts, and some that have been less so. He also met with some individuals who had spoken to the Swedish Radio journalists to hear directly from them their interpretation of the issues. The Sofala project management for their part explained the situation from the side of project operations – and discussed actions that had been taken to improve the situation moving forward.

A highlight of the trip was Peter's donation of several soccer balls to the local Nhambita school. Many of the kids are used to playing soccer with on balls made from plastic bags, so there was much delight at the receipt of "the real thing". Peter donated a ball exclusively to the girls of the school as he wanted to ensure that girls who wished to play soccer too have equal access to the new facility. The project is especially grateful to U&We for the strong and consistent support it has given to us, and we welcome a close and on-going relationship.

This was followed by a visit from Arla Foods accompanied by U&We in September 2013. Based on feedback, we believe the client was largely satisfied with the operations and overall enjoyed the visit. Commitments were made to improve certain aspects of the project operations, including regular reporting and information flow and updating of technical specifications.

2. ESI Desk Review

As part of Arla's support on the Sofala project, and specifically from some of the issues raised by the Swedish Radio report about aspects of the project, Arla Foods commissioned a desk review of the Sofala project which commenced in early March. The review was carried out by Stewart MacMorrow of Environmental Services Inc, based in California. The full report presented to Arla Foods was not made available to outside parties, but the indication provided to Envirotrade by ESI was that the project was doing the work it was supposed to at an acceptable level.

Envirotrade has been working with Plan Vivo to correct and update specific areas that were addressed. Not all items have been closed at the time of submission of this report, but should be complete by the submission of the next Annual Report due Q2 2015.

2015 Verification Audit

The project has commenced planning for the Plan Vivo and CCBA verification audits due in 2015. The target date for this is the end of Q2 2015. It is very important that all outstanding Corrective Action Requests (CARs) are resolved prior to this audit.

Donor Funding & Grants

The project remained reliant on donor funding to cover expenses for the period covered by this Annual Report. The project received donor funding in excess of \$150 000 – mainly from Mr Robin Birley, one of the original founders of the project. Envirotrade remains extremely grateful for Mr Birley's on-going support. Donations to the project are received through the African Carbon Livelihoods Trust, based in Mauritius.

In addition, the Sofala project received two very generous donations to assist with infrastructure in early 2013.

- A \$25 000 grant from U&We – which will be used for repairs and maintenance required on project vehicles, as well as for the purchase of some new tools and equipment for the carpentry shop.
- A \$55 000 (approx) grant from African Renaissance (AR) – a UK-based trust. Part of this grant is to be used for the electrification of the sawmill, carpentry shop and Nhambita camp by running a line off the main supply to the Gorongosa National Park. This installation has been officially approved by the authorities, and is awaiting disbursement of funds to the project.
- The balance of the AR grant will be used for the purchase of new equipment and upgrading of the sawmill at Nhambita. This will be done as soon as the mains electrical supply is in place.

Security Situation

The project faced a major operational challenge during the year with the escalation of the conflict between Renamo and the majority Frelimo government. The impact was mainly on the safety of employees and producers in carrying money, which meant that we had to be very cautious with regard to producer payments. In liaison with community leaders, we delayed some payments and planned carefully how they would be done. A further impact was that tourism to the area (particularly the Gorongosa National Park) came to a complete standstill – this has the impact of reducing income to the area which has knock-on effects on the local economy. The conflict continued until a peace agreement was signed in August of 2014.

3. Activities, Total Project Size & Participation

Total number of producers at each of the two project sites:

	Gorongosa	Zambezi Delta	Total
Community Groups	16	12	28
Men	797	898	1695
Women	602	502	1104
Totals	1399	1400	2799

Note: These totals have been adjusted from the 2012 figures as the community groups were previously included in the totals. Individual men and women make up the community groups, so they are already included in the individual totals. The figure of 2799 corresponds to the total number of project participants since inception.

Total area / size of each system & number of contracted producers:

System	Area (ha)	Contracts Gorongosa	Contracts Zambezi	Total PES Contracts
Boundary	2594 ^{*3}	1274	1038	2312
Dispersed Interplanting: Faidherbia	1107	824	157	981
Dispersed Interplanting: Glyricidia	54	64	0	64
Fruit Trees: Cashew	210	97	117	214
Fruit Trees: Mango	56	59	0	59
Homestead Planting	138	215	428	643
No Burning of Agri Residues ^{*4}	2805	1534	1308	2842
Woodlot	276	83	121	204
REDD+	9105	16	12	28
Totals	12 000^{*5}	4 166	3 181	7 347

Notes:

- Boundary planting is calculated using linear metres. This area is an approximation of total ha, based on converting the total linear planting to an area coverage.
- Please refer to explanation on next page. This system is under review and has been excluded from offset credit generation in this report. This is done as a precaution and an interim measure while the issues are addressed. It has been done in consultation with the Plan Vivo Foundation.
- As mentioned in Note 1, as many of the systems are either on the same, or overlapping areas of land, the total of 12000 ha is Envirotrade's approximation of the total area under project management.

Amendments & Changes to Technical Specifications

At the time of submission of this report, there were two technical specifications undergoing review and being amended:

- No Burning of Agri Residues
- REDD+

The No Burning tech spec has been peer reviewed and required some further analysis and explanations. During 2014 when this was done, several queries were raised by independent consultants that the volume of expected carbon sequestration from this activity could be incorrect. As a result, Envirotrade has suspended all carbon from this technical specification from that available for sale pending a decision as to how resolve and correct this issue. All active contracts with producers are being fully honoured by Envirotrade.

Plan Vivo requested that the REDD+ tech spec be re-drafted to amend the ex-ante crediting period from 42 years down to 10 years to comply with best practice. This has been done and it has been submitted to Plan Vivo for urgent peer review and approval. The impact of the change of crediting period is reflected in the large change of carbon stocks available for sale per the Carbon Summary Schedule under Section 4 compared to the 2012 annual report.

In terms of the Corrective Action Requests (CARs) requested by the Rainforest Alliance as part of the 2010 validation for CCBA, other technical specifications are being updated to fulfil requirements of the CCB standard. These modifications will be completed and submitted to Plan Vivo during 2015.

Envirotrade is making use of South African based technical support consultants, *Cirrus Africa* as well as Edinburgh based *Bioclimate R&D* to assist with the updating and modification of its technical specifications.

4. Submission for Plan Vivo Issuance

Carbon Summary Schedule

	Agro-Forestry Gorongosa	Agro-Forestry Zambezi Delta	REDD+	Sofala Project Totals
Total Carbon from all contracts	305 438	154 045	187 562	647 049
Less: Cancelled Contracts	9 197	7 794	0	16 991
Less: Suspended Contracts	74 119	18 934	0	93 053
Less: No-Burning under query <i>[Tech Spec being re-assessed]</i>	5 098	16 316	0	21 414
Equals: Active Carbon	217 023	111 006	187 562	515 591
Pre Plan Vivo Sale	9 175	0	0	9 175
Previous period sales	159 346	52 800	134 438	346 584
Current period sales	33 154	40 448	10 877	84 479
Total Sales to date	201 675	93 248	145 315	440 238
Remaining Carbon for sale	15 348	17 758	42 247	75 353

Table 1: Project CO₂ sales and allocations for this reporting period
(NB – 15 month period for this report)

	Agro-Forestry	REDD+
Total volume of CO ₂ forward sold (tCO ₂ -e)	73 602	10 877
Total Sale Price	\$448 506	\$73 461
Average Sale Price per tCO ₂ -e	\$6.09	\$6.75
Total number of producers / producer groups allocated to buyers	Not Applicable ^{*6}	
Total Area (ha)	Not Applicable ^{*7}	
Technical Specifications applied	All	
Price to Producers / Producer Groups (\$/tCO ₂ -e)	\$4.37 ^{*8}	\$1.00 ^{*9}
% of sale price that will reach the communities as PES	72%	15%

Notes:

6. Sales have not been allocated to individual farmers, but are spread across the pool of total producers. Allocations will be done once the contract period of 7 years for agro-forestry is complete.
7. As per Note 6, allocations will be done once the contract period of 7 years is complete.
8. Envirotrade has a fixed contract price of 111.50 Moz Meticais (MZN) per tonne that it pays to its producers. This does not fluctuate according to the achieved selling price. After deduction of risk buffers which vary between 10.5% & 15% depending upon technical specification, this works out at an average cost per saleable tonne to Envirotrade of 131.18 MZN. For this reporting period the exchange rate MZN / USD was approximately 30:1, yielding a price to producers of \$4.37 per tonne.
9. This is an anticipated average figure. There are a range of contracted activities which community members undertake to fulfil the REDD+ requirements (patrolling, early burning, fire-break burning). Their payment over the 10-year ex-ante crediting period will work out at approximately \$1 per tonne.

5. Sales of Plan Vivo Certificates

The following is a table of sales for the current 15 month period (Oct 2012 – Dec 2013). Prior year sales are attached to this report as an appendix.

Year sale agreed (Vintage)	Invoice	Purchaser	Certificates	Price/Cert	Total	Sales Commission	Net Rcpt
2012 (2013)	IN120075	Impact Choice	200				
2012 (2013)	IN120076	Non-carbon invoice	0				
2012 (2013)	IN120077	Zero Mission	4 086				
2012 (2013)	IN120078	Impact Choice	200				
2013 (2013)	IN130079	COTAP	274				
2013 (2013)	IN130080	Non-carbon invoice	0				
2013 (2013)	IN130081	Impact Choice	300				
2013 (2013)	IN130082	Zero Mission	4 076

Total:			84 479		\$521 967		
Average Price:					\$6.18		

6. Monitoring Results

Agro-Forestry Monitoring

During the year, a community delegation comprising producers approached Envirotrade with regard to trying to rehabilitate their cancelled contracts. It was agreed that it was in the interest of both the project co-ordinator and the producers that cancelled contracts be rehabilitated to continue payments, as well as to be able to sell the carbon. The project has therefore moved quite a number of contracts from a “Cancelled” classification to “Suspended”. The carbon value has not been brought back into saleable carbon at this stage as there needs to be a methodology developed to facilitate this.

After auditing, it was shown that the project experienced very poor monitoring results from two extensionists, and generally very good results from all the others. The monitoring was completely re-done in the cases of failure, and the individual employees were given support and further training to alleviate the problem. This progress will be monitored closely in 2014.

Agro-Forestry Contracts by monitoring condition (number)

Monitoring Condition	Gorongosa	Zambezi Delta	Total
Active Contracts	2 304	2 324	4 628
Suspended Contracts	1 424	440	1 864
Cancelled Contracts	422	405	827
Total	4 150	3 169	7 319

Agro-Forestry Contracts by monitoring condition (tCO₂-e)

Monitoring Condition	Gorongosa	Zambezi Delta	Total
Active Contracts	222 122	127 322	349 444
Suspended Contracts	74 119	18 934	93 053
Cancelled Contracts	9 197	7 794	16 991
Total	305 438	154 049	459 487

Note: These carbon values represent the total carbon monitored from all active contracts, and includes the contracts for the No-Burning Technical Specification which is currently under query and has been removed from the total carbon available for sale. The contracts with the producers remain valid and hence included in this table.

Reasons for less than full payments

Contracts are cancelled for fire, failure to engage in contracted conservation agriculture methods, or abandonment of the field. Contracts are suspended for a rate of tree mortality higher than 85%, while the project works to rectify the participant’s performance. When the contract is brought back into compliance, all missed payments are made.

Contracts are paid with a discount due to tree mortality between 15% and 85%. When the contract is brought back into compliance, all suspended payments are brought up to date.

REDD+ Monitoring

As mentioned in last year's report, a new REDD+ monitoring system was developed in 2011 which fulfils both Plan Vivo and VCS requirements. A system of 144 monitoring plots within the protected areas are used to objectively measure changes in biomass and causes of change. The success of the REDD+ system is gauged against results achieved from these monitoring plots.

Deforestation indicator	Likely contributing factors		Payment response/ adjustment
Deforestation <25% of baseline rate	Governance working effectively	Protection activities implemented effectively	Payment continues as per schedule
Deforestation 25-75% of baseline rate	Significant breakdown in governance	Protection activities not properly implemented	Payment reduces by 50% until next annual monitoring and enforcement of corrective actions
Deforestation >75% of baseline rate	Governance not functioning	No effective protection activities	Payment suspended until next annual monitoring and enforcement of corrective actions

In order to protect the forest, community teams are required to regularly patrol the protected area to look for any signs of farming or habitation encroachment, logging, or fire damage. In early winter there is a programme known as "early burning" where low intensity fires are used to clear undergrowth before it becomes too dry and potential fires would burn hot and cause significant damage to the forest. Finally the teams are also required to burn firebreaks. PES payments for these activities are based on the results of successful completion after monitoring.

The fire management and patrolling activities were successfully undertaken in 2013, and the contracted community participants were paid before year-end. The appearance of some new houses was detected in Bloc 10. This issue was addressed with the community involved and resolved.

A problem arose of certain markers in sample plots disappearing. New markings and better GPS mapping needs to be undertaken to alleviate this.

Burning of fire breaks

7. PES Update

Agro-Forestry

After the issues that were raised about “late” payments of Agro-Forestry PES in 2012, it was of prime concern to address this issue with the communities for the 2013 payments. Payments can only be made after completion of the monitoring process, and the project made it a target to complete this by May of 2013. Carbon Technical Manager, Aristides Muhate developed an Excel routine to monitor the data capturing of monitoring results on a daily basis.

Envirotrade had committed to commence payments before the end of Q2 (June) 2013. Unfortunately, just as payments were due to commence, political conflict started between Renamo and the government.

As a result the project took the decision to delay payments until certainty could be established that staff and community members would be safe receiving and transporting cash. As we were able to hold meetings in advance to distribute the remittances – this process was made easier and we received no complaints regarding the delay. Payments commenced in early July 2013.

Fortunately there were no significant impacts on the communities in either GG or ZD sub projects from this conflict which seemed to quieten down after about a month. As we approached the end of Q3 however, the conflict worsened, with Renamo officially withdrawing from the 1992 peace accord with Frelimo. To the end of 2013, the future of this renewed conflict seemed very uncertain – and there were military exchanges of fire frequently and a number of people, particularly military personnel, lost their lives.

New payment remittance:

The project introduced a new payment remittance for producers in 2013 which was met with great approval by recipients. The project distributed these remittances a week or so before actual payment was made, and significantly improved the time taken to make payments. It also allowed producers time to query the payment in advance if they felt there were any errors. There were a couple of errors detected owing to name similarity, and these were addressed and resolved.

Sample of new producer payment remittance

Associação Envirotrade Carbon Livelihood		Aviso de Pagamento ao Produtor	
Nome do Produtor:	Alverino Alfinete	Numero do Produtor:	898

	Total	386 131	\$ 12 871

Community Nurseries

These payments have not previously been disclosed as PES payments, but as they are direct payments to community members for the production of seedlings for use in the project, Envirotrade would like to disclose the quantities produced and the payments made as part of its PES disclosure.

8. Ongoing Community Participation

Transfer of Ownership

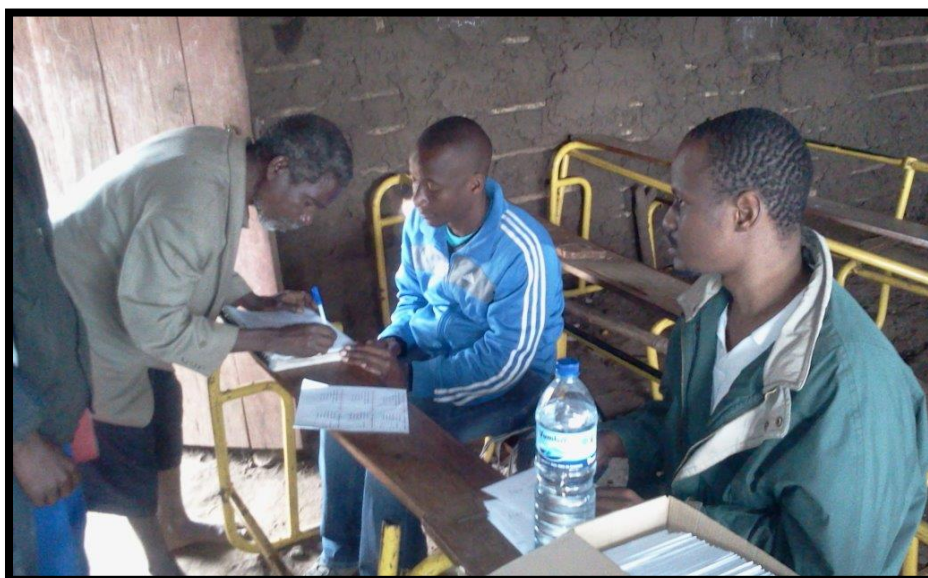

As mentioned in Section 2, 100% of the ownership of the Sofala Community Carbon Project was transferred at no cost to Envirotrade Sofala Lda (ESL) as of 1st February 2013. Envirotrade Sofala Lda is a Mozambique registered company, owned in turn by a non-profit community organisation, Associação Envirotrade Carbon Livelihoods (AECL). This was in terms of the envisaged transfer to local Mozambique ownership intended to occur in 2013 in terms of the project PDD.

ESL is now the project operator, and AECL is the ultimate project owner through its 100% holding of ESL. AECL provides community oversight and involvement in project operations.

Community Relations

Envirotrade worked closely with the communities in 2013 to address the issues around security and payments owing to the renewed conflict between Renamo and the government. In addition, we have held discussions related to the rehabilitation of suspended or cancelled contracts which as a result of a strong request from communities to do this. There are mutually beneficial reasons for us to try to make this work – within the requirements as to what is acceptable in the technical specifications.

Finally, there remains a waiting list of producers that would like to join the programme. The questions of us signing new contracts will hinge strongly on the financial sustainability of the project and the short and medium term prospects of it being able to sell the carbon offsets from new contracts.

Improved payment processing in 2013 with the new payment remittance form

9. Breakdown of Operational Costs

The following is a summarised Income and Expenditure Statement for the 15 month period of this report. It is compiled internally by Envirotrade and is at this stage unaudited.

	3 month	12 month
	Oct 12 - Dec 12	Jan 13 - Dec 13
Income		
Carbon Offset Sales	\$39 574	\$483 793
Less: ACLT comm. *2		-\$58 055
Donor Funding	\$30 000	\$140 000
Grants Received	\$55 000	\$25 000
Total Net Income:	\$124 574	\$590 738

	3 month	12 month
	Oct 12 - Dec 12	Jan 13 - Dec 13
Expenditure		
PES Payments	\$2 156	\$167 451
Plan Vivo Issuance Fee	\$1 794	\$31 997
Project Materials	\$22 370	\$53 500
Project Labour	\$22 889	\$90 867
Project Management	\$50 478	\$178 196
Admin Expenses	\$3 896	\$14 694
Motor Vehicle Exp	\$7 375	\$29 500
Premises Expenses	\$4 350	\$17 400
Travel & Visitors	\$690	\$5 710
Financial expenses	\$592	\$9 620
Capital Expenditure		
Electricity Installation		\$8 220
Total Expenditure:	\$116 591	\$607 155

Net Surplus / Deficit:	\$7 983	-\$16 417
-------------------------------	----------------	------------------

Notes:

1. These are the expenses of Envirotrade Sofala Lda, and have been drafted to exclude any expenses related to ECL and ACLT (the former owners and operators).
2. ACLT charged ESL a sales commission of 12% from Jan 2013 in terms of the marketing agreement between the two companies.

Appendix 1: Previous Sales of Plan Vivo Certificates

This table shows the sales of certificates from 2004 - 2012. Items highlighted in light blue have been adjusted in this year's report to remove inconsistencies between Plan Vivo and Envirotrade records which appear to have been caused by data capturing errors. The net effect of the changes was a reduction in reported sales to the end of 2012 of 9 022 tCO₂-e. [9 175 related to an initial sale the project made before being registered with Plan Vivo. This tonnage is however removed from the total available from the project to accurately reflect tonnage available for sale]. Plan Vivo and Envirotrade management have examined the sales history in detail and are satisfied that the following figures are correct and should be used from this point forward.

Year	Invoice	Purchaser	Certificates	Price/Cert	Total
